twkillian@gmail.com

Research Interests

Computational and mathematical strategies for efficient and effective *decision making* in the presence of uncertainty: particularly in the use of *transfer learning* within *deep Bayesian models*, applied to *reinforcement learning* and *healthcare*.

Education

Ph.D., Computer Science **Expected June 2023**
University of Toronto, Toronto, ON, Canada

Advisor: Marzyeh Ghassemi

M.Eng, Computational Science and Engineering **May 2017**
Harvard University, Cambridge, MA
- GPA: 3.92

Advisor: Finale Doshi-Velez
Thesis: Robust and Efficient Transfer Learning by Accounting for and Modeling Parameter Variation

BS, Mathematics **April 2013**
Brigham Young University, Provo, Utah
- GPA: 3.83

Skills and Languages

- Python
- Tensorflow, Pytorch
- LaTeX, MATLAB
- Java, CUDA, C++
- Fluent in Swedish

Awards

- ICML, Top Reviewer Award, 2019
- AAAI, Student Abstract Best Presentation, 2017
- MIT LL Lincoln Scholar, 2015-2017
- NDSEG Fellowship Award, 2013 (Declined)
- SMART Fellowship Finalist, 2011
- BYU ORCA Grant Recipient, 2010

Experience

Associate Technical Staff **June 2017 - present**
Air, Missile and Maritime Defense Technology, MIT Lincoln Laboratory
- Led effort to identify and develop areas for Laboratory investment in Artificial Intelligence
- Developing ML algorithms for efficient and accurate performance in low-data regimes
- Fusing multiple information sources to reduce false-alarms in aviation passenger screening

Assistant Technical Staff **May 2013 - May2017**
Air, Missile and Maritime Defense Technology, MIT Lincoln Laboratory
- Evaluated the impact of technological and operational improvements to U.S. missile defenses
- Developed and performed data-driven analyses to identify U.S. DoD capability improvements

Undergraduate Research Assistant **June 2010 - May 2013**
Department of Mechanical Engineering, Brigham Young University
- Published research on fluid activated passive dampening as primary author
- Furnished analytical and mathematical support to experimental techniques

Office of Naval Research NREIP Intern **Summer 2011**
Naval Surface Warfare Center, Dahlgren, Virginia

Language Instructor (Swedish) **December 2009 - June 2010**
Missionary Training Center, Church of Jesus Christ of Latter-day Saints

Volunteer

Program Committee/Reviewer
AAAI 2018-Present, NeurIPS ML4H Workshop 2017-Present, ICML 2019, NeurIPS 2019

Technical Recruiter, Campus Recruiting **December 2014 - present**
Human Resources, MIT Lincoln Laboratory

Committee Member; PED Seminar Series **June 2015 - December 2017**
MIT Lincoln Laboratory

Missionary, Sweden Stockholm Mission **March 2007 - March 2009**
The Church of Jesus Christ of Latter-day Saints

Projects

- **Weighted k-Centers, Optimal Facility Location** Using 2010 US Census data for the state of Massachusetts, we augmented Metric k-centers and Lloyd's algorithms to optimally place a constrained number of distribution centers. https://github.com/twkillian/am205-project
- **Stochastic Inference of Boston Bike-share Data** With data from the Hubway bike-sharing system from the 2012 season, we performed second order analyses to develop intuition about how to augment or improve the system. https://github.com/am207Hubway
- **Two-Stage Supermodular Minimization for Dictionary Selection** Developed preliminary approaches to solve dictionary selection under a supermodular assumption.
- **Automated Anomaly Detection in Surveillance Video** Attempted to provide real-time processing and identification of anomalous behavior in surveillance video, utilizing contemporary methods of parallel computing. https://github.com/cs205-surveillance
- **Quantitative Evaluation of Player Performance** Evaluated the transfer market of international soccer and the perception of player value. Developed a merit-based scoring metric, used to measure player impact in matches they participated in. This impact score was used to infer what value they would have on the transfer market. https://github.com/cs109-FIFA
